

Singles Match Play Notes

- Both players should make sure that they have their current handicaps.
- Matches are to be played from the MGA markers unless both players agree to play from another set of tees.
- A normal match is 18 holes, but players may decide to play any number of holes to determine the winner.
- Matches are played off the lowest handicap. For example, if a 6-hcp plays a 9-hcp, then the 9-hcp receives 3 strokes on handicap holes numbered 1 through 3.
- Flip a coin to determine which player tees off first.
- Determine how to handle a tie: sudden death, 9 extra holes, coin flip, etc. Suggestion: if a player gets 6 strokes, play a 3-hole playoff, with that player receiving 1 stroke on a designated hole.

Scoring

- Be sure to fill in a legible Singles Match Play scorecard containing names, local numbers, scores, date, and signatures.
- The winner should record the winner and score (4 & 3, 1 up, 19 holes, etc.) of the match on the Match Play board.
- Both players should input their scores with a “tournament” designation (use the tournament option of “Home,” “Away,” and “Tournament”).
- Put the scorecard in the tournament box.
